AAS Time Off Planner: Product Requirements Document

Version 1.4

23 October 2026

1. Document control

Item	Detail
Product	AAS Time Off Planner
Document	Product Requirements Document (PRD)
Version	1.4 (see change log, section 13)
Date	23 October 2026
Owner	Sean, Asensean (platform owner)
Companion	Technical Requirements Document (TRD) v1.4
Sources	Requirements plan Draft 5 (`docs/PLAN.md`), roadmap board, owner decisions to date
Status of build	Built and merged to `main`: company setup, company data separation, short labels, email sign-in, two-step sign-in, people management, company settings, bulk import of people, time off plans with levels and assignments, accrual engine and balances, requests and approvals with reminders and backup approvers, public holidays, team calendar and calendar feed links (in review), reports with Excel and CSV export (in review)

Requirement IDs (FR-, NFR-) are referenced by the TRD and by the roadmap board. Priorities: **M** must have for v1, **S** should have (v1.1), **C** could have (v1.2 or later).

2. Summary

AAS Time Off Planner is a multi-company absence management app for small and mid-sized companies. Employees request time off against plans assigned to them and see their balances. Managers see and approve their team's absences. Each company's HR admins run their own policies. The platform owner runs every company from one console, and no company ever sees another company's data.

The launch is four companies, the largest with about 20 employees, with staff across Canada and the United States. Data is hosted in Canada.

2.1 Problem

Small companies track leave in spreadsheets, email threads and payroll notes. Balances drift, approvals get lost, statutory minimums are missed, and payroll gets the wrong numbers. Off-the-shelf tools such as

BambooHR and Timetastic solve this for one company at a time, so an operator who serves several companies pays for and logs in to several accounts, and none of them handle Canadian and US statutory rules side by side.

2.2 Goals

1. One place for employees to request time off and see accurate balances.
2. Approvals that follow the company's rules, including a second approval for long absences.
3. Balances that follow each company's plans and each employee's jurisdiction, with warnings before anyone falls below a legal minimum or loses protected leave.
4. Strict separation between companies, enforced by the database, with one console for the platform owner.
5. Clean hand-off to payroll (WorkLinks) and to calendars, with private leave types kept private.

2.3 Non-goals for v1

- Payroll calculation, vacation pay percentages or pay rates (WorkLinks owns money; salary data is a backlog item).
- Hourly booking, hourly employees and overtime eligibility (backlog).
- Native mobile apps (the web app is responsive).
- Time and attendance, scheduling or shift management.
- Blackout periods and team "maximum off at once" limits (backlog).

3. Benchmark

Capability	BambooHR	Timetastic	Vacation Tracker	AAS Time Off Planner
Multiple plans per person	Yes	Yes	Yes	Yes, with levels
Accrual options	Yes	Annual grant	Yes	Lump sum, annual, semi-annual, quarterly, monthly, per hours worked
Statutory minimum and carryover checks	Partial (US)	No	Partial	Yes, Canadian provinces and US states, warnings and automatic overrides
Approvals	Up to 5 per policy	1 plus backup	1 to 2	Manager, admin or automatic; second approval for long runs
Private leave types	Partial	Yes	Yes	Yes, applies to calendars, feeds and API
Multi-company console	No	No	No	Yes

Copied on purpose: BambooHR's policy model and balance projection, Timetastic's privacy model, the wallchart calendar.

4. Users and roles

Role	Scope	Summary
Employee	Own records, one company	Requests, amends and cancels own time off; sees

Role	Scope	Summary
		balances; sees team calendar under privacy rules; personal calendar feed
Manager	Own records plus reports	Employee rights plus approvals for direct reports, team view, team feed. A manager is anyone with active direct reports.
HR admin	One company	Everything in that company: people, plans, balances, adjustments, reports, exports, integrations, branding. Must use two-step sign-in.
Finance (backlog)	One company	Reports and salary panel without HR rights over people
Platform owner	All companies, one at a time	Creates and configures companies; enters a company console (logged); sees only aggregate counts across companies. Must use two-step sign-in.

Rules:

- Each person has exactly one **primary manager**, who approves. A person may also have secondary managers, who see and are notified but do not approve.
- Nobody approves their own request. A person with no manager goes to HR.
- HR admins can decide on behalf of an absent manager; the decision is logged as an override.

5. Release scope

Release	Theme	Contents (board items)
v1 “Now”	First working version	Company setup and short labels; data separation; sign-in (email link, Google, Microsoft 365) and two-step for admins; people and managers; plan builder with levels; accrual engine; year-end with jurisdiction overrides; statutory minimums; requests, amend, cancel; approvals with second step; team calendar with privacy; calendar feed links; email notifications; core reports; XLSX and CSV export; WorkLinks pay period file; holiday calendars; audit log; security review; move to paid Canadian hosting
v1.1 “Next”	Connected	Direct Google and Microsoft 365 calendar push; Jira absence issues; availability API and webhooks for Jira Automation; utilisation and payroll reconciliation reports; API keys; dark and light mode switch with dark default; multiple time zones (home time zone per person)
v1.2 “Later”	Chat	Slack and Microsoft Teams notifications and approvals
Backlog	Not scheduled	Salary data and dollar liability; finance role; hourly employees and overtime; Google Sheets export; blackout periods; maximum off per team; hourly requests; mobile apps; dedicated database per company; Jira Forge app; MCP server for AI assistants; demo videos for each persona with English captions; guided in-app help for each persona with an on/off preference; French interface for Quebec (future item, only if a

Release	Theme	Contents (board items)
		company hires someone working in Quebec)
Blocked	Outside dependency	WorkLinks live API (partner documentation); native Jira capacity (no Atlassian API)
Declined		Confluence “Who’s out” page; Bradford Factor report

6. Functional requirements

6.1 Companies and branding

ID	Requirement	Pri	Acceptance criteria	Status
FR-01	The platform owner can create a company with full legal name, short label, sign-in address, optional custom domain, brand colour and country.	M	Company appears in the console; invalid or duplicate values are refused with a message on the field.	Built
FR-02	Each company has a short label (required, unique ignoring case and spaces, 24 characters or fewer). The short label is used in the company selector and every notification; the full legal name is used on reports, exports and the audit log.	M	Duplicate “northwind” vs “Northwind” refused; email subjects use the label; reports show the legal name.	Built (selector and notification use grow with features)
FR-03	Each company is reached at its own sign-in address (`name.<platform domain>`) or its own custom domain. Unknown addresses show “not found”.	M	Company page shows its label and colour; unknown address returns 404.	Built
FR-04	HR admins can upload a logo and pick brand colours; the app checks text contrast against WCAG AA and adjusts button text automatically.	M	Low-contrast colour flagged; buttons stay readable.	Partly built (colour set at creation; upload and editing pending)
FR-05	Company selector for the platform owner is a dropdown of short labels, searchable when long.	M	Matches mock-up.	Pending
FR-06	Each company has a time zone used for “today”, approval deadlines and	M	Year-end runs at midnight company time.	Built (setting); used by the accrual engine when built

ID	Requirement	Pri	Acceptance criteria	Status
	year-end processing (default America/Toronto in Canada, America/New_York in the US).			

6.2 Sign-in and access

ID	Requirement	Pri	Acceptance criteria	Status
FR-10	Email sign-in link: single use, 15 minutes, same answer whether or not the address is known, opens a Continue page so scanners cannot use it up.	M	Reused, expired or other-company links refused.	Built
FR-11	Google Workspace and Microsoft 365 sign-in for companies that use them. Email must match an active person in that company.	M	Sign-in works from any company address through one fixed return address.	Pending owner app registrations and platform domain
FR-12	Two-step sign-in (authenticator app) required for HR admins and the platform owner, with 10 recovery codes.	M	Admin pages unreachable until the code is entered.	Built
FR-13	Sessions last 12 hours, are limited to the company's address, and end on sign-out.	M	Copied session rejected on another company's address.	Built
FR-14	People marked inactive cannot sign in.	M		Built
FR-15	Platform owner "enter company" visits are recorded in that company's audit log.	M		Pending

6.3 People

ID	Requirement	Pri	Acceptance criteria	Status
FR-20	HR admins can add, edit and deactivate people: name, email, job title, team, location, jurisdiction (province or state, and city where a local law applies), start date, primary and secondary managers, role, standard hours per day,	M	A manager must be active and belong to the same company; no one manages themselves; no management loops; at least one active HR admin remains; deactivation signs the person out.	Built (city-level jurisdiction pending)

ID	Requirement	Pri	Acceptance criteria	Status
	work days.			
FR-21	Bulk import of people and opening balances from CSV or XLSX, with a preview and row-level errors before anything is saved.	M		Built for people (CSV or XLSX, preview with row-level problems, matched by email, all-or-nothing); opening balances follow the plan engine
FR-22	Directory search by name, email, team, manager, location or job title, with active, inactive or all.	M		Built

6.4 Plans and accrual

ID	Requirement	Pri	Acceptance criteria	Status
FR-30	Unlimited admin-defined plans (starter templates: Vacation, Wellbeing, Sick, Personal, Bereavement, Parental, Unpaid, Lieu).	M		Built (starter templates: Vacation, Wellbeing, Sick, Personal, Unpaid; all nine categories available)
FR-31	Plan levels: each plan can have levels with their own days per year; each person has one level per plan; a mid-year level change prorates the rest of the plan year.	M		Built
FR-32	Plan year starts on any date (default 1 January), set per plan.	M		Built (day 1 to 28 of any month)
FR-33	Units: days and half days (default) or hours. Requests are always in days and half days; hours plans deduct the person's standard hours per day.	M		Built (hours plans deduct the person's standard hours per day)
FR-34	Accrual methods: lump sum (at plan year start, on hire, or on anniversary), periodic (annual, semi-annual, quarterly, monthly; credited at period start, or end if chosen), per hours worked (salaried staff on their standard week), manual grants with reason.	M		Built (manual grants are balance adjustments, FR-57)
FR-	First year prorated from the	M	15 days, start 10 June: 8.75	Built

ID	Requirement	Pri	Acceptance criteria	Status
35	start date by remaining months (start month counts if on or before the 15th), rounded to the nearest half day; configurable per plan.		rounds to 9.0.	
FR-36	Year end per plan: no carryover, capped carryover with optional expiry date, unlimited, or maximum balance cap; payout flag for reporting.	M		Built (payout flag stored; payout report pending)
FR-37	Jurisdiction overrides apply automatically at year end (for example, no forfeiture of earned vacation in California, Colorado, Montana and Nebraska; statutory vacation in Canada cannot simply expire). Each override is shown in the year-end preview and the audit log.	M		Built in the engine (overrides are ledger rows naming the rule); year-end preview pending
FR-38	Statutory minimum table by province and state and years of service. Warnings on plan save, ahead of service anniversaries, and in a compliance report. The app warns; it does not block.	M		Partly built (table seeded, marked unverified pending legal review; warnings on the admin's person page; plan-save warning and compliance report pending)
FR-39	Tenure increases per plan, off by default.	M		Built
FR-40	Other plan settings: approval mode, negative balance limit, waiting period, coworker visibility (plan name, Out of office, hidden), calendar status, working days or calendar days, tracked only.	M		Built (enforced on every request)
FR-41	Holiday calendars per province and state, preloaded and editable, plus company holidays.	M		Built (all provinces and territories, US federal list, company holidays; marked unverified pending legal review)
FR-42	Balance projection to plan year end and to any future	M		Partly built (projection to plan year end; any future

ID	Requirement	Pri	Acceptance criteria	Status
	date.			date pending)
FR-43	A plan's unit, earning method, plan year start, lump sum timing and frequency cannot change once the plan has balances; the admin creates a new plan instead.	M	Saving such a change shows a message on the field.	Built

6.5 Requests and approvals

ID	Requirement	Pri	Acceptance criteria	Status
FR-50	Request form: plan (only assigned plans), first and last day, half day on first or last day, comment. Live summary: working days after weekends and holidays, balance after, overlap with own requests, team members already off, who approves.	M		Built (overlaps are blocked rather than warned)
FR-51	Approval mode per plan: automatic, primary manager, or HR admin.	M		Built
FR-52	Second approval: when an absence runs more than 10 working days in a row, the primary manager's own manager also approves (falls back to HR admin). The run counts joined-up bookings in any plan; weekends and holidays do not break it. Threshold set per company; can be turned off per plan.	M	Friday wellbeing day plus two weeks vacation = 11 days, two approvals.	Built (automatic and HR-approved plans have no second step)
FR-53	Amend: pending requests edit freely; changes to approved time off go back through approval while the original dates stay booked.	M		Built
FR-54	Cancel: pending cancels at once; approved future time needs approval (per plan); past time admin only.	M		Built (per-plan setting, on by default)
FR-55	Decline needs a comment. Reminders for pending	M		Built (reminder after 2 business days, HR told after

ID	Requirement	Pri	Acceptance criteria	Status
	approvals, then escalation to HR. Backup approver for a date range.			5, both set per company)
FR-56	HR admins can add or amend time off for anyone with a required reason, optionally approved immediately and optionally overriding the negative balance limit; logged.	M		Partly built (HR can add time off for anyone; editing someone's existing request from their page is pending)
FR-57	Balance adjustments (credit or debit) with reason and effective date; logged.	M		Built

6.6 Calendars

ID	Requirement	Pri	Status
FR-60	Team calendar (wallchart and month grid) with filters by team, location and plan. Coworkers see the plan name, "Out of office", or nothing, by plan setting; managers see types for their reports; HR sees all.	M	Built, in review (week grid of 2 to 6 weeks; a month view is pending)
FR-61	Private, resettable calendar feed links (ICS) for each person and each team, for Google, Outlook and Apple. Names and dates only; no comments or balances.	M	Built, in review (my time off, my team, people I manage)
FR-62	Direct Google Calendar and Microsoft 365 connection (events within seconds; optional Outlook out-of-office).	S	Planned (v1.1)
FR-63	Dark and light mode switch, dark by default, saved per person.	S	Planned (v1.1)
FR-64	Multiple time zones. Each person has a home time zone (default: company time zone). Requests are recorded against the requester's home time zone: dates, "today", past and future rules, half days, deadlines and escalations use it. Managers, HR and teammates see requests localized to their own zone, with the requester's zone shown when it differs. Calendar entries, reminders and notifications go out in each recipient's zone; reminders at a sensible local hour. Reports state the time zone in the run label.	S	Planned (v1.1)

6.7 Reports and exports

All reports are HR admin only. Each shows title, company legal name, filters and a “Run on <date, time, time zone> by ” label on screen and in every export, with sortable columns, filters, plain labels with units and a totals row.

ID	Report	Pri	Status
FR-70	Who’s out (today, week, range)	M	Built, in review
FR-71	Balance summary with projection	M	Built, in review
FR-72	Year-end forfeiture preview (30 days before year end, with overrides)	M	Built, in review
FR-73	Absence rate and days lost	M	Built, in review
FR-74	Approval metrics	M	Built, in review
FR-75	Untaken leave liability in hours	M	Built, in review
FR-76	Compliance (below a minimum now or within 90 days)	M	Built, in review
FR-77	Audit report	M	Built, in review
FR-78	Utilisation; payroll reconciliation	S	Planned (v1.1)
FR-79	XLSX and CSV export of every report (run label, frozen header, filters on)	M	Built, in review
FR-80	Liability in dollars from an admin-only salary table; finance role; Google Sheets export	C	Backlog

6.8 Integrations

ID	Requirement	Pri
FR-90	WorkLinks pay period import file: plan to WorkLinks code mapping per company; corrections after a period closes; download or SFTP.	M
FR-91	WorkLinks live API once partner documentation is available.	Blocked
FR-92	Jira absence issues per approved absence, with time estimates.	S
FR-93	Availability API (out or available by date, no plan type) and signed webhooks for Jira Automation and other systems; scoped API keys.	S
FR-94	Slack and Microsoft Teams notifications and approvals.	C
FR-95	MCP server so people can use the app from AI assistants under their own role and company.	C

6.9 Notifications

ID	Requirement	Pri	Status
FR-100	Email for: request submitted, needs your approval, approved, declined, changed, cancelled, reminder, second approval needed, year-end preview, statutory warning. Subjects start with the company short label. Private plan names never appear in emails to anyone but the	M	Partly built (submitted, needs approval, second approval, approved, declined, booked or changed by HR, reminders and escalation; year-end preview and statutory warning emails pending)

ID	Requirement	Pri	Status
	person, their approvers and HR.		
FR-101	Reminders of upcoming time off to the person and their manager, by email and in calendar feeds. On by default at 5 days and 1 day before; each person can turn them off or change the timing.	M	Pending

6.10 Audit

ID	Requirement	Pri	Status
FR-110	Append-only audit log of sign-ins, approvals, admin edits, adjustments, exports, plan changes, platform owner visits. Entries cannot be edited or deleted.	M	Built (log and first events)

7. Non-functional requirements

ID	Area	Requirement
NFR-01	Separation	No company can read or change another company's data, enforced by the database. Automated tests prove it on every change.
NFR-02	Residency	All production data, backups, email and logs in Canada.
NFR-03	Privacy	Sensitive plans (sick, wellbeing, medical) private by default. Quebec Law 25 and PIPEDA observed; privacy impact assessment before launch for Quebec staff.
NFR-04	Security	OWASP ASVS level 2 as the target; two-step sign-in for privileged roles; encryption in transit and at rest; secrets outside code; dependency audit on every change; penetration test before real data.
NFR-05	Accessibility	WCAG 2.2 AA for all screens, in light and dark mode, including company brand colours.
NFR-06	Performance	Pages under 1 second at the 95th percentile for up to 100 concurrent users; reports under 3 seconds for 500 employees.
NFR-07	Availability	99.5% monthly during business hours (Canada and US time zones) after release.
NFR-08	Recovery	Point-in-time recovery; lose no more than 15 minutes of data; restore within 4 hours.
NFR-09	Retention	Configurable per company, default 7 years for payroll-relevant records; deletion on request where law allows.
NFR-10	Responsiveness	Works at phone width (390 px) without sideways scrolling.
NFR-11	Cost	Free during build with synthetic data only; reassess at release.

8. Success measures

Measure	Target, 90 days after release
Requests made in the app rather than email or spreadsheets	95% or more
Median time from request to decision	Under 1 business day
Payroll corrections caused by leave data	Zero in two consecutive pay periods
Employees below a statutory minimum without a warning	Zero
Cross-company data incidents	Zero

9. Assumptions and dependencies

- All four companies use WorkLinks. US staff are salaried and not overtime-eligible. No company is federally regulated.
- Each company has its own Jira Cloud site (Standard or Premium).
- Owner provides: platform domain; Google and Microsoft app registrations; WorkLinks partner contact; GitHub Pro (to enforce branch protection) before real code merges at scale.
- Statutory figures are checked by an HR or employment law reviewer before launch.

10. Risks

Risk	Likelihood	Impact	Mitigation
WorkLinks API never available	Medium	Medium	File export works on day one
Statutory table wrong or out of date	Medium	High	Legal review at launch; yearly review; dated rules table
Cross-company data leak	Low	Severe	Database-enforced separation, guard tests, penetration test
Branch protection not enforced on free GitHub plan	High (today)	Medium	Upgrade to GitHub Pro; pull-request discipline meanwhile
Single owner and single developer	High	Medium	Documented process, CI, this PRD and TRD
Scope growth before v1	Medium	Medium	Roadmap board with explicit promotion

11. Open decisions for the owner

#	Decision	Needed by
D1	Platform domain (for example aas-timeoff.ca)	Google and Microsoft sign-in
D2	Google and Microsoft app registrations (instructions sent separately)	Google and Microsoft sign-in
D3	~~Part-time and non-standard work weeks~~ Resolved: in v1 (work days and hours per day	

#	Decision	Needed by
	per person, built)	
D4	~~Company time zones~~ Resolved: one per company in v1 (built); home time zone per person in v1.1 (FR-64)	
D5	WorkLinks file format and partner contact	Payroll export
D6	GitHub Pro upgrade	Before more contributors
D7	Legal reviewer for statutory tables	Before release (statutory figures are in the app, marked unverified)
D8	Should employees and managers also be offered (optional) two-step sign-in?	Before release
D9	Release budget for Canadian hosting (estimate in TRD)	Release
D10	Defaults chosen during the build, to confirm: automatic and HR-approved plans skip the second approval; cancelling approved future time needs approval unless a plan turns it off; Quebec observes Good Friday (HR can switch to Easter Monday); US companies start with all 11 federal holidays; Canadian statutory protection at year end counts carried days toward the minimum	Before release

12. Glossary

Term	Meaning
Company (tenant)	One customer organisation with its own people, plans and data
Short label	Display name used in the selector and notifications
Plan	A type of time off with its own rules (Vacation, Sick)
Level	A version of a plan with its own days per year (Vacation Senior 20)
Run	Consecutive working days off, joined across bookings
Jurisdiction	Province or state (and city) whose employment law applies to a person

13. Change log

Version	Date	Changes
1.0	23 Oct 2026	First full scope.
1.1	23 Oct 2026	D3 and D4 resolved (part-time work weeks and company time zone in v1, both built). FR-06, FR-20 and FR-22 built. FR-21 in progress. Added FR-64, multiple time zones, to v1.1. These documents are now updated after each merged feature.
1.2	23 Oct 2026	FR-21 bulk import of people built (opening balances follow the plan engine). Added the model delegation rule: simpler work goes to lower

Version	Date	Changes
		AI models and is reviewed; the owner is asked before escalating to a higher model.
1.3	23 Oct 2026	FR-30 to FR-42 status added: plans, levels, assignments, accrual engine, year-end carryover and expiry, jurisdiction overrides and balances built. Added FR-43 (plan settings lock once balances exist). Backlog: persona demo videos with captions, guided in-app help, French interface for Quebec as a future item (no Quebec companies or staff today).
1.4	24 Oct 2026	Status added for FR-50 to FR-57, FR-60 to FR-64, FR-70 to FR-80 and FR-100. Requests and approvals, reminders, escalation and backup approvers built; holidays built; team calendar, calendar feeds and reports built and in review. Added FR-101 (reminders of upcoming time off). Added D10 (defaults to confirm).
